

World Class Cyber Security

Our cybersecurity solutions are founded on customer trust.

Cybersecurity involves safeguarding our computer systems and networks from theft and preventing damage to our hardware and software.

eight2s4[®]

Eight2s4 is a spin-off of A IVORY CONSULTORIA E TREINAMENTOS LTDA, a well-known technology consulting firm. Eight2s4 is a specialized business unit that aims to provide cutting-edge solutions in cybersecurity, cloud computing, and other emerging technologies.

Through strategic partnerships with major players in the industry such as Watchguard, Exbiz Akamai, and AWS, Eight2s4 is able to deliver high-quality and proven solutions to its clients. The company firmly believes that technology can drive innovation and growth, and it is dedicated to helping its customers achieve their goals with advanced, customized technological solutions.

With a highly qualified and experienced team of specialists, Eight2s4 is ready to take on any challenge and provide its clients with exceptional service and tailored solutions. The company is committed to innovation and views it as the key to success in today's business landscape.

If you're looking for a partner that can help you navigate the complexities of the technology industry and drive growth through innovation, look no further than Eight2s4. Join the company on its exciting journey and discover how it can help you achieve success.

Cyber Security Services

At our company, we specialize in providing comprehensive cybersecurity services that cover prevention, monitoring, incident response, and remediation. Our expertise extends across a diverse range of industries, including aviation, finance, retail, and manufacturing.

With a focus on proactive measures and continuous monitoring, we help our clients stay ahead of emerging threats and potential vulnerabilities. In the event of a security incident, our experienced team is ready to respond quickly and effectively, minimizing any potential damage and ensuring a rapid return to normal operations.

From vulnerability assessments and penetration testing to security awareness training and ongoing monitoring, we offer a full suite of services to meet the unique needs of each of our clients. Our commitment to excellence and customer satisfaction has earned us a reputation as a trusted partner in the cybersecurity industry.

If you're looking for a partner that can help you stay ahead of the ever-evolving cyber threat landscape, look no further than our company. We're ready to work with you to develop a customized cybersecurity solution that meets your unique needs and protects your valuable assets.

Innovative DNA

We Constantly Evolve Our Digital Ecosystem for Businesses

What we do at Eight2s4

We breathe cloud.

Helping companies and businesses to extract the maximum flexibility and agility in multi-cloud platforms.

We protect.

Ongoing security testing, detection and managed response, training and emergency response staff.

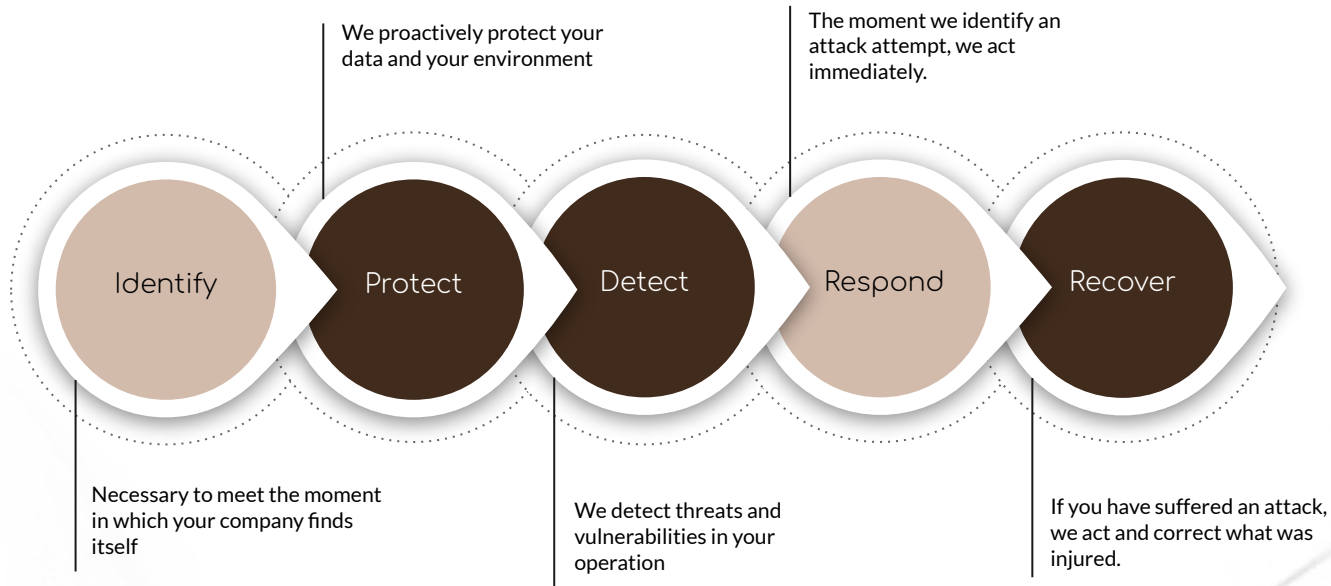

To plan. Ramp up. To develop

Increase the ability of companies to develop applications and services at high speed with high quality through data analysis.

Cybersecurity framework

Hacker attack prevention

Solutions

Pentest

Security Framework

Vulnerability Assessment

SecDevOps

What problems solve

Por meio das melhores ferramentas de mercado e profissionais altamente qualificados, estas soluções contribuem para a identificação dos alvos e principais vulnerabilidades que podem gerar riscos e prejuízos para a companhia.

Com análises e testes contínuos dos ambientes, somos capazes de neutralizar as tentativas de ataque hacker.

Alerts and monitoring

Solutions

SIEM

Security
Operation Center

EDR

What problems solve

- Monitoring, analysis and response to information security incidents 24/7 365 days paid as a service;
- The client will not have to worry about having Cyber Security professionals or retaining them;
- Supports LGPD compliance issues;
- Consolidates logs, events and flows in a single technology;
- Enables the correlation of these logs, events and flows to build security alarms;
- Increases cybersecurity visibility and generates inputs for SOC monitoring, analysis, and response.

Network Security and Connectivity

Solutions

WAF

NGFW

Wi-fi

Switch Gerenciado

Secure SD-WAN

Endpoint Security

What problems solve

- Provides protection, security and availability. This service is available in physical or virtual formats and can be configured according to your specifications;
- End-to-end security with integrated endpoint control, policy enforcement, centralized management and monitoring;
- Control what your employees can access;
- Enables more efficient and cost-effective network connectivity when using internet service to provide continuous redundancy and performance;
- Ensure that only authorized people access the corporate environment.

SUPPORT: Customer Service

Eight2s4's Support team has a team of Public Cloud specialists who manage the Client's environment. The team is responsible for managing the entire customer environment and ensuring the support of all Cloud Computing services and resources.

Operation Fronts:

- **Environment Monitoring:**
Monitoring of infrastructure, platforms and services, generating alerts and calls for action and support of environments.
- **Incident Support:**
Incidents caused by instabilities, degradation or that impact the production environment are dealt with by the support team immediately with expert support.
- **Handling Requests and GMUDS:**
Service to requests made by the customer are met according to prioritization in the call queue and in the case of GMUDs, approved by the Ivy Group change committee

SUPPORT Service Queue

Events

- | Events generated by Cloudwatch and Zabbix;
- | Immediate analysis performed by the NOC.

Requests

- | Requests made by the customer;
- | Technical feasibility analysis;
- | Details of activities;
- | Technical performance;
- | Documentation.

Incidents

- | Immediate action (SLA);
- | Scaling;
- | Post Mortem.

SRE: Site Reliability Engineering

Agility and stability of the environment

- SRE teams use tools to manage systems, troubleshoot issues, and automate operational tasks.
- The practice of SRE is very useful in the development of scalable and highly reliable software systems. It helps manage large systems through code, which is more scalable and feasible for system administrators managing hundreds of machines.

Improve customer experience

- Having the customer at the center of all actions through recurring alignments, being fundamental for prioritizing demands that aim to reduce errors and instabilities.

Budget predictability

- Need for IT budget predictability, giving early visibility of the need for investments needed to scale your architecture in line with business objectives.

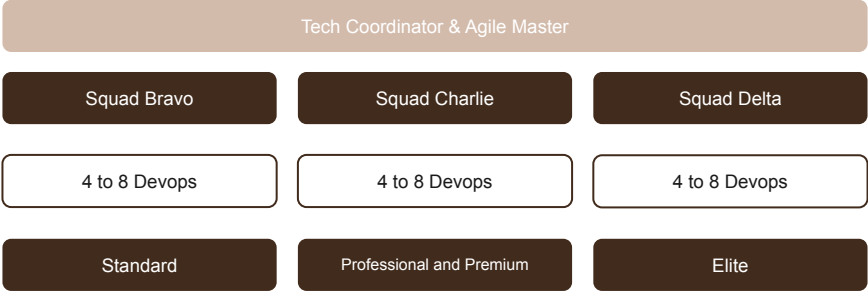

Scope of Activities - SRE

- Monitoring of infrastructure, platforms and services, generating alerts and calls for action and support of environments;
- Attendance to Incidents caused by instabilities, degradation or that generate impact to the productive environment;
- Infrastructure provisioning with IAC (Infrastructure as code);
- Cloud Infra architecture design;
- Software Delivery Pipelines (CI/CD);
- Monitoring / Observability;
- Kubernetes support;
- Preventive Security Report / Cost Reduction - Customer Portal;
- TAGs in all environments;
- Automation Scripts;
- Monthly Book Report.
